

14 OCT 1977

MEMORANDUM FOR: Career Management Officer, DDA

FROM: Robert W. Gambino  
Director of Security

SUBJECT: Industrial Security Program (U)

REFERENCES: (a) Routing and Record Sheet from the  
Executive Officer, DDA dated 7 October  
1977, same subject

(b) Memorandum from Director of Security  
to Career Management Officer, DDA  
dated 4 October 1977, same subject

1. (C) The 30 additional positions authorized the Office of Security by the Director of Central Intelligence in FY78 and FY79 for enhancing our industrial security program will be used as follows:

a. Sixteen positions have been allocated to form an industrial security audit branch. This branch will conduct periodic, unannounced, comprehensive security inspections of industrial contractor facilities.

b. Two positions have been allocated to the Information Systems Security Group to provide computer security support for the industrial audits of contractor computer facilities.

c. Five positions have been allocated to the Special Security Center. Three of these positions involve sensitive compartmented information (SCI) policy support to the industrial area and the industrial security audit program. The two remaining positions are dedicated to managing the SCI clearance program as it applies to industry. Specifically, their responsibilities will include monitoring the number of access approvals in industry; developing and enforcing

OS 7 4495/1

CONFIDENTIAL

guidelines for the justification of issuing industrial SCI approvals and assisting in investigations of unauthorized disclosures of SCI that may originate or appear to originate in the industrial world.

d. Seven positions have been allocated to the Polygraph Branch. These additional personnel will be used exclusively to perform polygraph examinations on key personnel in industrial organizations currently holding sensitive Agency contracts.

25X9  
25X1A  
2. (C) Apart from those recommendations specifically relating to industry, there is another requirement arising specifically from the Moore case which I wish to address immediately and which will require additional positions to accomplish. The staff field reinvestigation and reinvestigation polygraph program must be established on a five-year cycle. This would result in the field reinvestigation and repolygraphing of [REDACTED] employees per year. To this end I will require: five professional and two clerical positions for the [REDACTED] which will carry the heaviest burden of staff reinvestigations; three professional and two clerical positions for the Clearance Division to assist in the scheduling, appraisal and adjudication of the reinvestigation/repolygraph programs and three professionals and one clerical for the Polygraph Branch to enable it to meet administrative and operational requirements implicit in reaching the target of [REDACTED] staff repolygraphs per year. 25X9

3. (C) It is my desire to implement a formal industrial Audio Countermeasures Inspections (ACM) program of CIA contractor facilities as soon as possible. We would be remiss as an Agency if we strengthen all other phases of an industrial security program and neglect the very real possibility of hostile audio penetrations of our sensitive contractor facilities. Indeed, the need for such inspections has already been raised in a recent industrial security audit report and is a suggested course of action in the [REDACTED] Manual. 25X1A

25X9  
4. (C) A program designed to permit annual ACM inspections of [REDACTED] sensitive facilities and biannual

25X9

inspections of another [REDACTED] locations would require the addition of six professional positions and one clerical position to the Technical Security Division. Additional funds in the amount of \$250,000 would be required for one time non-personnel service costs (equipment) as well as \$125,000 annually to cover travel and per diem expenditures.

+ 7

5. (C) Since it is my intention to move as rapidly as possible on these programs, your earliest attention to the need for the additional personnel and funding would be appreciated.

NOTE FOR: Acting Deputy Director for Administration  
FROM :   
SUBJECT : Industrial Security Program (C)

1. (AIUO) Attached is a proposed answer to Jack including plans from both the Offices of Communications and of Security. You may want to rewrite this in your own words.

2. (AIUO) In addition attached is a memorandum to the Office of Communications approving their proposed plan. As you will note, although it was addressed to me, they did ask for approval so that they can continue.
